

WINFIELD[™] MYSTIC[®] HC

SPRAY PATTERN INDICATOR

Mystic[®] HC is a temporary blue colorant for use in marking spray applications. By using Mystic[®] HC in the spray mix of plant protection products, applicators can see the spray placement and ensure a uniform application of fertilizer and pesticide.

CAUTION KEEP OUT OF REACH OF CHILDREN

READ LABEL BEFORE USING

Do not take internally. In case of eye contact, flush with large amounts of water and consult a physician. In case of ingestion, dilute with water or milk and consult a physician. Most hand stains or clothing stains may be easily removed with soap and water.

STORAGE AND DISPOSAL

Do not reuse this container. Rinse contents into the spray tank and dispose of or recycle bottle. This product is not intended for use on edible food crops. Do not apply to food or feed crops or grain after harvest.

For Ornamental, Industrial and Forestry Use

Flat fan spraying tips are recommended when applying MYSTIC[®] HC. Greater volumes of spray solution should be used when MYSTIC HC is applied to areas which are difficult to mark. Longer or thinner stands of vegetation may be more difficult to mark due to the non-uniform marking surface. Increasing the total volume of spray solution applied to those areas should reduce marking difficulty. Experimentation with the volume of spray solution and rate of MYSTIC HC applied per acre or area should allow the applicator to establish an economical and effective rate for each application.

When applied by handgun or boom sprayers, add 10-25 oz. per 100 gallons (4-8 oz. per acre) in 5-20 gallons of water per acre. If higher gallonage of water per acre is used, adjust rate of MYSTIC HC accordingly. Spot or handgun applications using MYSTIC HC may be performed utilizing backpack or handgun equipment. Add 1/8 - 1/4 oz. of MYSTIC HC per gallon when applied by spot guns or backpack sprayers.
