General Directions for use with Electrostatic Spraying
Remove by-standers and pets from the area to be treated. Do not use for treatment of humans, air, or for fumigation. Spray droplet particle size should be set to a limit volume median diameter of > 40µm. Use half face respirator with chemical specific cartridge and M5 filters. Plan the spray routine to minimize unnecessary exposure to treated areas (for example, begin applying product in the back of the room/area and work towards the front of the room/area). Place the electrostatic spray function in the ON position for electrostatic spray models that have the functionality to toggle ON/OFF. Once treatment is completed, allow for a 15 minute resettling time before reentry to the treated space. Consider material compatibility and potential for damage prior to application.

For use as a Multi-Surface One-Step Cleaner and Disinfectant by Electrostatic Spraying
To disinfect hard, non-porous surfaces, dilute at 1:32 (4 fl. oz./gal). For visibly soiled areas, pre-cleaning is required. Apply use solution with electrostatic sprayer to hard, non-porous environmental surfaces. Spray approximately 6 to 12 inches from the surface, making sure to wet surfaces thoroughly. All surfaces must remain visibly wet for the required time indicated in the directions for use, reapplying if necessary. Let air dry. When using on food contact surfaces, thoroughly rinse all treated surfaces with potable water.

Empty all feeding and watering appliances. Saturate surfaces with a use-solution 1:32 (4 fl. oz./gal) for a period of 5 minutes. Wipe or allow to air dry. Saturate all animal handling and restraining equipment as well as forks, shovels, and scrapers used to remove litter and manure. Rinse all surfaces that come in contact with food, including equipment used for feeding and watering, with potable water before reuse. Ventilate buildings and other closed spaces. Do not house animals or employ equipment until treatment has been absorbed, set or dried.
DISINFECTION AND DEODORIZING OF ANIMAL HOUSING FACILITIES (BARN, KENNELS, CAGES, HUTCHES, ETC): Remove animals and feed from facilities. Remove litter, waste matter, and gross soils. Empty all troughs, rack and other feeding and watering equipment. Thoroughly clean all surfaces with soap or detergent and rinse with water. Saturate all barriers, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and scrapers used for removing litter and manure.
