

# SAFETY DATA SHEET

ECOLAB®

## STONEMEDIC MPP MARBLE POLISHING POWDER

### 1. Chemical product and company identification

**Chinese name** : 大理石抛光粉  
**Product name** : STONEMEDIC MPP MARBLE POLISHING POWDER  
**Other names** : None.  
**Product code** : 910985  
**Recommended use and restrictions** : Floor care product  
Use only for the purpose on the product label.  
**Manufacturer/Supplier** : Ecolab Limited  
**Address/Telephone** : 6F, No. 13, Sec. 2, Peitou Rd., Peitou Dist.,  
Taipei, 112, Taiwan, R.O.C.  
(02) 2898-4800  
**Emergency telephone number** : 1-651-222-5352 (in USA)

### 2. Hazards identification

**GHS Classification** : CORROSIVE TO METALS - Category 1  
ACUTE TOXICITY: ORAL - Category 2  
ACUTE TOXICITY: SKIN - Category 5  
SKIN CORROSION/IRRITATION - Category 1B  
SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 1

#### GHS label elements

**Symbol**

**Signal word**

: Danger

**Hazard statements**

: May be corrosive to metals.  
Fatal if swallowed.  
May be harmful in contact with skin.  
Causes severe skin burns and eye damage.

#### Precautionary statements

**Prevention**

: Wear protective gloves. Wear eye or face protection. Wear protective clothing.  
Keep only in original container. Do not breathe dust or mist. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling.

**Response**

: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or physician. IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Immediately call a POISON CENTER or physician. IF IN EYES: Immediately call a POISON CENTER or physician.

**Other hazards**

: Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat. Fine dust clouds may form explosive mixtures with air.

### 3. Composition/information on ingredients

Nature of material : Mixture  
 Chemical properties : Floor care product

| Hazardous ingredients | Concentration Range (%) | CAS number |
|-----------------------|-------------------------|------------|
| oxalic acid           | > 50                    | 144-62-7   |
| aluminium oxide       | 20 - 50                 | 1344-28-1  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

### 4. First aid measures

#### First aid measures

- Eye contact** : In case of contact, immediately flush eyes with cool running water. Remove contact lenses and continue flushing with plenty of water for at least 15 minutes. Get medical attention immediately.
- Skin contact** : In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Clean shoes thoroughly before reuse. Apply calcium gluconate gel, if available, or milk of magnesia to affected area.
- Inhalation** : If inhaled, remove to fresh air. If exposed person is not breathing, give artificial respiration or oxygen applied by trained personnel. Get medical attention immediately.
- Ingestion** : Rinse mouth; then drink one or two large glasses of water. Do not induce vomiting. Never give anything by mouth to an unconscious person. If available, take several calcium antacid tablets (eg Tums) or several tablespoons of milk of magnesia. Get medical attention immediately.

#### Most important symptoms/effects, acute and delayed

- Eye contact** : Causes serious eye damage.
- Skin contact** : Causes severe burns. May be harmful in contact with skin.
- Inhalation** : May give off gas, vapor or dust that is very irritating or corrosive to the respiratory system.
- Ingestion** : Fatal if swallowed. May cause burns to mouth, throat and stomach.

**Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If ventilation is inadequate, use respirator that will protect against dust/mist. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

**Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

See toxicological information (Section 11)

### 5. Fire-fighting measures

**Suitable fire extinguishing media** : Use dry chemical powder.

**Specific hazards arising from the chemical** : Fine dust clouds may form explosive mixtures with air.

**Hazardous thermal decomposition products** : Decomposition products may include the following materials:  
 carbon dioxide  
 carbon monoxide  
 metal oxide/oxides

**Specific fire-fighting methods** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

## 5. Fire-fighting measures

**Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## 6. Accidental release measures

**Personal precautions** : Initiate company's spill response procedures immediately. Keep people out of area. Put on appropriate personal protective equipment (see section 8). Do not touch or walk through spilled material.

**Environmental precautions** : Avoid contact of spilled material and runoff with soil and surface waterways.

**Methods for cleaning up** : If emergency personnel are not present, contain and collect small spillages with non-combustible absorbent material, e.g. sand, earth or other suitable material and place in a suitable container for disposal. Use a water rinse for final clean-up.

## 7. Handling and storage

**Handling** : Do not ingest. Do not get in eyes or on skin or clothing. Do not breathe dust. Use only with adequate ventilation. Wash thoroughly after handling.

**Storage** : Keep out of reach of children. Keep container tightly closed. Keep container in a cool, well-ventilated area.

Store between the following temperatures: -10 and 50°C

## 8. Exposure controls/personal protection

### Control parameters

| Ingredient name | Exposure limits                                                                                                                            |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| oxalic acid     | <b>Taiwan Council of Labor Affairs (Taiwan, 1/2010).</b><br>STEL: 2 mg/m <sup>3</sup> 15 minute(s).<br>TWA: 1 mg/m <sup>3</sup> 8 hour(s). |

**Biological indicator** : Not available.

**Appropriate engineering controls** : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. Provide suitable facilities for quick drenching or flushing of the eyes and body in case of contact or splash hazard.

### Personal protection

**Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing.

**Eye protection** : Use chemical splash goggles. For continued or severe exposure wear a face shield over the goggles.

**Hand protection** : Use chemical-resistant, impervious gloves.

**Skin protection** : Use synthetic apron, other protective equipment as necessary to prevent skin contact.

**Respiratory protection** : A respirator is not needed under normal and intended conditions of product use.

## 9. Physical and chemical properties

### Appearance

|                                        |                                                                           |
|----------------------------------------|---------------------------------------------------------------------------|
| Physical state                         | : Powder                                                                  |
| Color                                  | : White                                                                   |
| Odor                                   | : Odorless                                                                |
| pH                                     | : 0.5 to 2.5 (1%)                                                         |
| Melting point                          | : Not available.                                                          |
| Boiling point                          | : >100°C (>212°F)                                                         |
| Flash point                            | : > 100°C                                                                 |
| Evaporation rate (butyl acetate = 1)   | : Not available.                                                          |
| Flammability (solid, gas)              | : Not available.                                                          |
| Explosion limits                       | : Not available.                                                          |
| Vapor pressure                         | : Not available.                                                          |
| Vapor density                          | : Not available.                                                          |
| Relative density                       | : 0.75 to 0.95 (Water = 1)                                                |
| Solubility                             | : Partially soluble in the following materials: cold water and hot water. |
| Partition coefficient: n-octanol/water | : Not available.                                                          |
| Auto-ignition temperature              | : Not available.                                                          |

## 10. Stability and reactivity

|                                    |                                                                                                                                                                                                                                                                                                                                                           |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Stability                          | : The product is stable.                                                                                                                                                                                                                                                                                                                                  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                                                                                                                                                                                                                                                                         |
| Conditions to avoid                | : Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Prevent dust accumulation. |
| Materials to avoid                 | : Slightly reactive or incompatible with the following materials: alkalis.                                                                                                                                                                                                                                                                                |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.                                                                                                                                                                                                                                                    |

## 11. Toxicological information

|                   |                                                                                                                           |
|-------------------|---------------------------------------------------------------------------------------------------------------------------|
| Route of exposure | : Skin contact, Eye contact, Ingestion                                                                                    |
| <b>Symptoms</b>   |                                                                                                                           |
| Eye contact       | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness                                              |
| Skin contact      | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur                    |
| Inhalation        | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>Respiratory tract irritation |
| Ingestion         | : Adverse symptoms may include the following:<br>stomach pains                                                            |

## 11. Toxicological information

### Acute toxicity

- Eye contact** : Causes serious eye damage.
- Skin contact** : Causes severe burns. May be harmful in contact with skin.
- Inhalation** : May give off gas, vapor or dust that is very irritating or corrosive to the respiratory system.
- Ingestion** : Fatal if swallowed. May cause burns to mouth, throat and stomach.

### Toxicity data

| Product/ingredient name | Result | Species | Dose | Exposure |
|-------------------------|--------|---------|------|----------|
| Not available.          |        |         |      |          |

### Chronic toxicity

- Carcinogenicity** : No known significant effects or critical hazards.
- Mutagenicity** : No known significant effects or critical hazards.
- Teratogenicity** : No known significant effects or critical hazards.
- Developmental effects** : No known significant effects or critical hazards.
- Fertility effects** : No known significant effects or critical hazards.

## 12. Ecological information

- Ecotoxicity** : No known significant effects or critical hazards.

### Aquatic and terrestrial toxicity

| Product/ingredient name | Test         | Result                | Species | Exposure |
|-------------------------|--------------|-----------------------|---------|----------|
| oxalic acid             | Intoxication | Acute EC50 136.9 mg/L | Daphnia | 48 hours |

### Persistence and degradability

| Product/ingredient name | Test | Result | Dose | Inoculum |
|-------------------------|------|--------|------|----------|
| Not available.          |      |        |      |          |

| Product/ingredient name | Aquatic half-life | Photolysis | Biodegradability |
|-------------------------|-------------------|------------|------------------|
| Not available.          |                   |            |                  |

### Bioaccumulative potential

| Product/ingredient name | LogP <sub>ow</sub> | BCF | Potential |
|-------------------------|--------------------|-----|-----------|
| Not available.          |                    |     |           |

- Mobility in soil** : Not available.
- Other adverse effects** : No known significant effects or critical hazards.

## 13. Disposal considerations

- Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## 14. Transport information

Certain shipping modes or package sizes may have exceptions from the transport regulations. The classification provided may not reflect those exceptions and may not apply to all shipping modes or package sizes.

UN number : UN3261

Proper shipping name : CORROSIVE SOLID, ACIDIC,  
ORGANIC, N.O.S. (Oxalic acid,  
dihydrate)

Class : 8

Packing group : II

Marine pollutant (Yes / No) : Not a pollutant.

Specific precautionary  
transport measures and  
conditions : -

**See shipping documents for specific transportation information.**

## 15. Regulatory information

### TCSCA List of toxic chemicals

| <u>Listed no.</u> | <u>Series no.</u> | <u>Product name</u> | <u>RQ</u> | <u>Class</u> |
|-------------------|-------------------|---------------------|-----------|--------------|
| Not available.    |                   |                     |           |              |

List of chemicals for which  
manufacturing or handling  
is defined as "work specially  
hazardous to health" : Not available.

List of chemicals reputed to  
be a "threat of imminent  
danger" : This product contains substances considered to be a "Threat of imminent danger":  
oxalic acid.

LSHL Article 21 : Not available.

Safety, health and  
environmental regulations  
specific for the product : Not available.
