

Technical Data Sheet

Product:

Yellow Moth Walls

Code:

CAT-MW-50

Description:

The Yellow Moth Walls are sticky liners that visually attract the moths and then restrain them inside the trap. Use with the Mothcatcher trap.

Length: 445 mm in upper end and 380 mm in lower end.

Height: 150mm.

Materials: Polypropylene sheet with non-drying pressure sensitive glue and silicon paper.

Application

Handling: After removing from the outer carton, remove silicon lining paper and place the liner inside the Mothcatcher trap. Reassemble to trap and hang in place.

When to use the trap: Quarantine: Around the year. Monitoring: From first flight to the last flight.

How many to use: Subject to application and plot size. Quarantine: 1 liner in every Mothcatcher, replace every 4-6 weeks with the pheromone Monitoring:

Data collection: Weekly but more frequently during the active critical part of the crop cycle.

The polyethylene sheet coated with a hot melt pressure sensitive adhesive at a rate of 180 GSM on the inside.

After removing from the outer carton, remove the silicon lining paper, place the liner inside the trap.

Storage

Store in a cool, dry place.

Servicing the trap: Traps should be serviced regularly. Old liners should be collected and disposed with away from the site and preferably outside the orchard.

Precautions

Wash hands before and after handling.
