

Technical Data Sheet

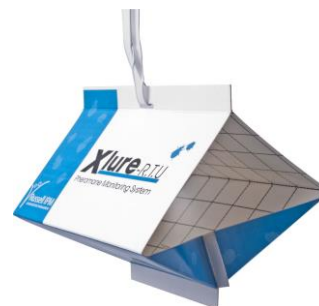

Product

Xlure RTU Combo 4

Code

CAT-NLURE-COMBO 4

Description

A ready-to-use prebaited diamond trap containing nature identical pheromones for attracting stored product insects for monitoring purposes

Active ingredient: Insect pheromones for Plodia, Ephestia, Trogoderma and Lasioderma spp. in inert adhesive layer.

Inert ingredient: Craftboard trap with adhesive coating.

Longevity: 6-8 weeks.

Packaging: 6 pre-baited diamond traps with hanger in resealable foil bag.

Application

Open the aluminium foil bag and remove the diamond trap. Pinch the sides together and fold in the ends to create trap sides. Thread the hanger through the top of the trap and suspend in suitable location. Examine the trap 2-3 times per week. Change the trap after ~8 weeks and/or once full with insects, whichever occurs first.

Trap Spacing: Traps should be placed in a grid formation approximately 10-20 metres apart. Placing traps at shorter intervals may help to pinpoint an infestation. Always take into consideration the site of use e.g. structure of building, air flow, doorways and fork lift pathways etc.

Storage

Store at room temperature in a cool, dry place.

Precautions

Wash hands after contact.

Take care if in use around small children.
