

Section 1. Chemical product and company identification

Chinese name : -
Product name English : STONEMEDIC CFR CEMENT FILM REMOVER
Supplier : Ecolab Limited
 15/F, Lu Plaza, 2 Wing Yip Street, Kuan Tong, Kowloon, HONG KONG
Emergency telephone number : 852-2341-4202
Product type : Floor Cleaner
Date of issue : 5 August 2008

Section 2. Hazards identification

Hazard classification : Class 8 Corrosive substances
Routes of entry : Skin contact, Eye contact, Inhalation, Ingestion
Human health hazards
Inhalation : Corrosive to the respiratory system.
Ingestion : Causes burns to mouth, throat and stomach.
Skin : Corrosive to the skin.
Eyes : Corrosive to eyes.
Environmental hazards : No known significant effects or critical hazards.
Fire/explosion hazards : In a fire or if heated, a pressure increase will occur and the container may burst.

Section 3. Composition/information on ingredients

Mixture

Chemical name	Concentration	CAS No.
hydrochloric acid	10 - 30	7647-01-0

Section 4. First aid measures

Inhalation : If inhaled, remove to fresh air. If exposed person is not breathing, give artificial respiration or oxygen applied by trained personnel. Get medical attention immediately.
Ingestion : If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention immediately.
Skin contact : In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Clean shoes thoroughly before reuse. Get medical attention immediately. Wash clothing before reuse.
Eye contact : In case of contact, immediately flush eyes with cool running water. Remove contact lenses and continue flushing with plenty of water for at least 15 minutes. Get medical attention immediately.

-

Section 5. Fire fighting measures

Extinguishing media

- Suitable** : Use an extinguishing agent suitable for the surrounding fire.
- Not suitable** : None known.
- Hazardous combustion products** : Decomposition products may include the following materials:
halogenated compounds
- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
- Materials to avoid** organic materials, metals, strong acids, strong alkalis

Section 6. Accidental release measures

- Personal precautions** : Ventilate area of leak or spill. Do not touch damaged containers or spilled material unless wearing appropriate protective equipment (Section 8). Stop leak if without risk. Do not allow to enter drains or watercourses.
- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
- Methods for cleaning up** : If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage

- Handling** : Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Use only with adequate ventilation. Keep container closed. Wash thoroughly after handling.
- Storage** : Keep out of reach of children. Keep container tightly closed. Keep container in a cool, well-ventilated area.
Store between the following temperatures: -10 and 40°C

Section 8. Exposure controls/personal protection

Chemical name	Exposure limits
hydrochloric acid	GBZ-2 (China, 8/2007). MAC: 7.5 mg/m ³

- Recommended monitoring procedures** : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment.
- Occupational exposure controls** : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Personal protection

- Respiratory** : Wear appropriate respirator when ventilation is inadequate and occupational exposure limits are exceeded.
- Hands** : Use chemical-resistant, impervious gloves.
- Eyes** : Use chemical splash goggles. For continued or severe exposure wear a face shield over the goggles.

-

Section 8. Exposure controls/personal protection

Skin : Use synthetic apron, other protective equipment as necessary to prevent skin contact.

Section 9. Physical and chemical properties

Physical state : Liquid. [Liquid.]
Color : Red. [Light]
Odor : Pungent.
pH : 0.25 Conc. (% w/w): 100%]
Flash point : >93.3 °C (Closed cup)
Specific gravity : 1.073
Solubility : Easily soluble in the following materials: cold water and hot water.

Section 10. Stability and reactivity

Stability and reactivity : The product is stable.
Conditions to avoid : No specific data.
Materials to avoid : organic materials, metals, strong acids, strong alkalis
Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Acute toxicity

Inhalation : Corrosive to the respiratory system.
Ingestion : Causes burns to mouth, throat and stomach.
Skin : Corrosive to the skin.
Eyes : Corrosive to eyes.

Potential chronic health effects

Chronic effects : No known significant effects or critical hazards.
Carcinogenicity : No known significant effects or critical hazards.
Mutagenicity : No known significant effects or critical hazards.
Teratogenicity : No known significant effects or critical hazards.
Developmental effects : No known significant effects or critical hazards.
Fertility effects : No known significant effects or critical hazards.

Section 12. Ecological information

Other adverse effects : No known significant effects or critical hazards.
Environmental effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Waste disposal : The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Consult your local or regional authorities.

-

Section 14. Transport information

UN number : UN1789
Proper shipping name : HYDROCHLORIC ACID
Package mark : Corrosive substances
Packing group : III

Section 15. Regulatory information

China inventory (IECSC) : All components are listed or exempted.

Authored with regard to:

- "Classification and Mark for commonly used dangerous chemicals" (GB13690-1992)
- "General rules for preparation of a Chemical Safety Data Sheet" (GB16483-2000)
- "The principle of classification of transport packaging groups of dangerous goods" (GB/T15098-94)
- "Classification and code of dangerous goods" (GB6944-2005)

Section 16. Other information

Validation date : 5 August 2008
Prepared by : Regulatory Affairs
Date of previous issue : No previous validation
☑ Indicates information that has changed from previously issued version.

Notice to reader

The above information is believed to be correct with respect to the formula used to manufacture the product in the country of origin.
