SANIMAXX**ACTIVE INGREDIENTS:** Quaternary Ammonium Compounds 80-100 G/l

Sanimaxx is a new generation liquid sanitiser based on a synergistic blend of mixed chain quaternary and surfactant components. Unlike traditional quaternary sanitisers, Sanimaxx has true broad spectrum sanitising activity, even in hard water and in the presence of some organic soil. Sanimaxx is used for spray or foam sanitising of equipment, floors and walls in food processing plants. When used in "No Rinse" applications, a residual film of antimicrobial activity is left on sanitised surfaces.

DIRECTIONS FOR USE: Sanimaxx is suitable for spray or foam sanitation of clean equipment, floors and walls in food processing and beverage plants. Sanimaxx can also be used in footbaths and for soak sanitising of pre-cleaned equipment parts. Before sanitising with Sanimaxx ensure all equipment is thoroughly cleaned using a recommended Ecolab detergent, then rinse all surfaces thoroughly. Where approved, Sanimaxx can be used in a no-rinse application up to 0.4% v/v (400ppm Quaternary). When used above this rate, Sanimaxx should always be followed with a potable water rinse.

Processing Equipment: Spray or soak all cleaned surfaces with 150-400ppm active quaternary (0.15 - 0.4% Sanimaxx). Contact time: minimum 1 minute. Floors and Walls - sanitise with 400 - 600ppm active quaternary (0.4 - 0.6% Sanimaxx). For periodic soaking of drains, use 800 - 1,000ppm active quaternary (0.8 - 1.0% Sanimaxx). Foot Baths - Make up 1,000-2,000ppm active quaternary (1.0-2.0% Sanimaxx). Replace footbath when heavily soiled. Fogging - Prepare a solution of 900-1,000ppm active quaternary (0.9-1.0% Sanimaxx). Use 1 litre of this solution for every 50 cubic metres of air space.

Consult your Ecolab representative for specific use instructions and recommended application equipment.

FIRST AID: Absorb spillage to prevent material damage. Immediately call the NATIONAL POISONS CENTRE 0800 764 766 or a doctor/physician, have product container or label at hand.

IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.

PRECAUTIONS: Wear protective gloves. Wear eye or face protection. Wear protective clothing. Wash thoroughly after handling. Avoid release to the environment.

STORAGE: Store locked up. Keep container tightly closed. Keep container in a cool, well-ventilated area.

DISPOSAL: Prevent spillage entering water drains. For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid proof container for disposal. For large spills, dye spill material or otherwise contain material to ensure runoff does not reach a waterway. Place spill material in an appropriate container for disposal.
