

**WARNING – KEEP OUT OF REACH OF CHILDREN.
PLEASE READ LABEL CAREFULLY BEFORE USE.**

BioFOAM+FOG

Fat Emulsifier and Odour Suppression Blanket

BioFOAM+FOG is leading the world in ease and simplicity by combining a Bio-Agent and Foaming product for the removal of Fat, Oil and Grease in waste water systems, and removing odour from toilets and washrooms, plus removing body fat. It also provides a physical barrier to reduce odours from occurring.

When used through BioChem Solutions patented dispersal system, it does the following:

- Removes FOG (fat, oil and grease)
- Eliminates Hydrogen Sulphide and other hazardous gases.
- Protects capital equipment from costly corrosion.
- BioFoam+FOG increases the oxygen level which assists in the reduction of odour in sewer plants.
- Removes odours from toilet and washrooms.

BioFOAM+FOG is readily biodegradable with the highest consideration of modern surfactant technology, unlike other foaming products which are not readily biodegradable.

BioFOAM+FOG is non-corrosive, non-toxic and safe for the environment at recommended dose rates.

Directions of Use:

Effluent Management: Use in combination with BioChem Solutions patented dispersal system to automatically dispense into effluent plants, waste water pipes and wet wells.

Large Grease Traps: Automatically dose through our dispenser into grease traps for the management of odours, removing blockages and maintain the health of your trap.

This may be used for cleaning large processing rooms provided the room can be divided into distinct areas, no edible product or packaging material is present in the area during cleaning and there can be no possibility of contamination of product or packaging material as a result of cleaning. Food contact surfaces must be rinsed with water after use.

First Aid and Safety Instructions

Keep locked up and out of the reach of children.
When using or decanting wear eye protection and gloves.

Risk: Risk of serious damage to eyes. Causes severe burns.

Eyes: Irritating to eyes. If in eyes, hold eyes open and flush with continuously with water for at least 15 minutes or until a doctor or Poisons Information instructs you.

Skin and Hair: Rinse with water until you are certain all residues have been removed.

Swallowed: Do not induce vomiting, give a glass of water. If poisoning occurs seek medical advice and show the label and SDS whenever possible.

More information is available on Safety Data Sheets.

Emergency Poisons Number

NZ: 0800 764 766 • International: +64 3 479 7227

Spills or Leaks: Ensure adequate ventilation. Wear PPE. Cover with dry earth, sand or other non-combustible material and transfer to containers for appropriate disposal later.

Fire: Use carbon dioxide, dry chemical, foam or water spray. Do NOT use water jets. Cool containers with flooding quantities of water well after the fire is out.

It is normal for this product to settle a small amount on the bottom of the container.
