

**WARNING – KEEP OUT OF REACH OF CHILDREN.
PLEASE READ LABEL CAREFULLY BEFORE USE.**

Fat, Oil, Grease and Odour Removal

Powerful blend of powdered Bio-Agent, biodegradable surfactant and effervescent agents combine to efficiently reduce blockages, foul odour, fat, oil, grease and organic material from drains, sewer systems, grease traps and anywhere else organic material collect to cause issues.

Because of the foaming nature of the product it works effectively to remove all organic material.

BioBUGS is non-corrosive, non-toxic and safe for the environment. It is safe for septic systems

Net contents 1 kg

Directions of Use:

Grease Traps: Ideally dose once a day for 7 days then once a week, ongoing. Use the sachet (10 – 50 grams) or scoop (30 grams), add to the drain waste, sink or basin where there is a blockage or build-up of FOG. The further away from the grease trap the better the result. BioBUGS can be added directly to the grease trap as an initial charge.

Toilets, Urinals and Blocked Pipes: Use the sachet or scoop to add to the area you wish to unblock. Add and wait 5 minutes for the foam to build up then either flush or add water.

Fruit Flies: Dose the drains and basins each week to remove any organic material in the S bend and drain system. The foaming nature of the product will get into the small areas where fruit fly breed.

Septic Systems: Dose based on how busy your system is being loaded. High loads once a week and low loads once a month, 30 – 50 grams.

Portaloos: Dose 10 grams for a weekly hire. Dose 30 – 50 grams per 1 – 2 weeks depending on how heavy the usage is.

Long Drop: Dose once a month in winter, once a week in summer.

This compound may be used for treating sewer or drain lines in any area.

Before use in edible areas all edible products must be removed from the room and the drains must be thoroughly flushed before edible operations re-commence.

First Aid and Safety Instructions

Eyes: Avoid contact with eyes. If in eyes and open wounds, hold eyes open and flush with water for at least 15 minutes. **Skin:** Rinse with water. **Swallowed:** Do not induce vomiting, give a glass of water.
