| Use(s)        | PESTICIDE                                                                                                                                                       |
| SDS date      | 18 April 2018                                                                                                                                                   |

### 2. HAZARDS IDENTIFICATION

CLASSIFIED AS HAZARDOUS ACCORDING TO SAFE WORK AUSTRALIA CRITERIA

**Risk Phrases**

R40 Limited evidence of a carcinogenic effect.

**Safety Phrases**

S36/37 Wear suitable protective clothing and gloves.

S46 If swallowed, contact a doctor or Poisons Information Centre immediately and show container or label.

NOT CLASSIFIED AS A DANGEROUS GOOD BY THE CRITERIA OF THE ADG CODE

|               |                |                        |                |
|---------------|----------------|------------------------|----------------|
| UN Number     | None Allocated | Transport Hazard Class | None Allocated |
| Packing Group | None Allocated | Hazchem Code           | None Allocated |

### 3. COMPOSITION/ INFORMATION ON INGREDIENTS

| Ingredient                              | CAS Number | EC Number | Content       |
|-----------------------------------------|------------|-----------|---------------|
| 1-NAPHTHYL-N-METHYLCARBAMATE (CARBARYL) | 63-25-2    | 200-555-0 | 1.8%          |
| CARRIER                                 | -          | -         | Not Available |
| GRAIN(S)                                | -          | -         | Not Available |

### 4. FIRST AID MEASURES

|                  |                                                                                                                                                                                                          |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye              | If in eyes, hold eyelids apart and flush continuously with running water. Continue flushing until advised to stop by a Poisons Information Centre, a doctor, or for at least 15 minutes.                 |
| Inhalation       | If inhaled, remove from contaminated area. Apply artificial respiration if not breathing.                                                                                                                |
| Skin             | If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. Continue flushing with water until advised to stop by a Poisons Information Centre or a doctor. |
| Ingestion        | For advice, contact a Poisons Information Centre on 13 11 26 (Australia Wide) or a doctor (at once). If swallowed, do not induce vomiting.                                                               |
| Advice to doctor | This product is a cholinesterase inhibitor affecting the nervous system and producing cardiac and respiratory depression. Administer atropine sulphate. The dose and the frequency of atropine will      |

**PRODUCT NAME    DAVID GRAYS CRICKET & GRASSHOPPER KILLER BAIT****Advice to doctor**

vary with each patient, but the patient should remain fully atropinised. In severe cases pralidoxime may be administered as well, if given within 24 hours after exposure. Artificial respiration or oxygen may be necessary. Monitor respiratory, cardiac and central nervous system function. Also monitor red blood cell and plasma cholinesterase levels. Watch for pulmonary oedema and delayed neurological symptoms.

Contraindications - Morphine, barbiturates, phenothiazine derivatives, tranquillisers, and all kinds of central nervous system stimulants are contraindicated. Also, large amounts of intravenous fluids are generally contraindicated because of the threat of pulmonary oedema.

**First aid facilities**

Eye wash facilities and safety shower should be available.

---

**5. FIRE FIGHTING MEASURES**

---

**Flammability**

Combustible. May evolve toxic gases (carbon/ nitrogen oxides, hydrocarbons) when heated to decomposition. Finely divided dust may form explosive mixtures with air.

**Fire and explosion**

Evacuate area and contact emergency services. Toxic gases may be evolved in a fire situation. Remain upwind and notify those downwind of hazard. Wear full protective equipment including Self Contained Breathing Apparatus (SCBA) when combating fire. Use waterfog to cool intact containers and nearby storage areas.

**Extinguishing**

Use an extinguishing agent suitable for the surrounding fire.

**Hazchem code**

None allocated.

---

**6. ACCIDENTAL RELEASE MEASURES**

---

**Personal precautions**

Wear Personal Protective Equipment (PPE) as detailed in section 8 of the SDS.

**Environmental precautions**

Prevent product from entering drains and waterways.

**Methods of cleaning up**

If spilt, collect and reuse where possible. Contain spillage, then cover / absorb spill with non-combustible absorbent material (vermiculite, sand, or similar), collect and place in suitable containers for disposal.

**References**

See Sections 8 and 13 for exposure controls and disposal.

---

**7. STORAGE AND HANDLING**

---

**Storage**

Store in a cool, dry, well ventilated area, removed from fertilizers, moisture, seeds, incompatible substances, heat or ignition sources and foodstuffs. Ensure containers are adequately labelled, protected from physical damage and sealed when not in use. Check regularly for leaks or spills.

**Handling**

Before use carefully read the product label. Use of safe work practices are recommended to avoid eye or skin contact and inhalation. Observe good personal hygiene, including washing hands before eating. Prohibit eating, drinking and smoking in contaminated areas.

---

**8. EXPOSURE CONTROLS / PERSONAL PROTECTION**

---

**Exposure standards**

| Ingredient | Reference | TWA |                   | STEL |                   |
|------------|-----------|-----|-------------------|------|-------------------|
|            |           | ppm | mg/m <sup>3</sup> | ppm  | mg/m <sup>3</sup> |
| Carbaryl   | SWA (AUS) | --  | 5                 | --   | --                |

**Biological limits**

No biological limit allocated.

**Engineering controls**

Avoid inhalation. Use in well ventilated areas. Maintain dust levels below the recommended exposure standard.

**PPE**

|                    |                                                                                                                                                   |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye / Face</b>  | Wear dust-proof goggles.                                                                                                                          |
| <b>Hands</b>       | Wear PVC or rubber gloves. When using large quantities or where heavy contamination is likely, wear full-length PVC or full-length rubber gloves. |
| <b>Body</b>        | Wear coveralls. When using large quantities or where heavy contamination is likely, wear PVC boots.                                               |
| <b>Respiratory</b> | Where an inhalation risk exists, wear a Class P1 (Particulate) respirator.                                                                        |

## 9. PHYSICAL AND CHEMICAL PROPERTIES

|                                  |                      |
|----------------------------------|----------------------|
| <b>Appearance</b>                | TAN COLOURED PELLETS |
| <b>Odour</b>                     | SLIGHT ODOUR         |
| <b>Flammability</b>              | COMBUSTIBLE          |
| <b>Flash point</b>               | NOT RELEVANT         |
| <b>Boiling point</b>             | NOT AVAILABLE        |
| <b>Melting point</b>             | NOT AVAILABLE        |
| <b>Evaporation rate</b>          | NOT AVAILABLE        |
| <b>pH</b>                        | NOT AVAILABLE        |
| <b>Vapour density</b>            | NOT AVAILABLE        |
| <b>Specific gravity</b>          | NOT AVAILABLE        |
| <b>Solubility (water)</b>        | NOT AVAILABLE        |
| <b>Vapour pressure</b>           | NOT AVAILABLE        |
| <b>Upper explosion limit</b>     | NOT RELEVANT         |
| <b>Lower explosion limit</b>     | NOT RELEVANT         |
| <b>Partition coefficient</b>     | NOT AVAILABLE        |
| <b>Autoignition temperature</b>  | NOT AVAILABLE        |
| <b>Decomposition temperature</b> | NOT AVAILABLE        |
| <b>Viscosity</b>                 | NOT AVAILABLE        |
| <b>Explosive properties</b>      | NOT AVAILABLE        |
| <b>Oxidising properties</b>      | NOT AVAILABLE        |
| <b>Odour threshold</b>           | NOT AVAILABLE        |

## 10. STABILITY AND REACTIVITY

|                                         |                                                                                                                                                |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Chemical stability</b>               | Stable under recommended conditions of storage.                                                                                                |
| <b>Conditions to avoid</b>              | Avoid heat, sparks, open flames and other ignition sources.                                                                                    |
| <b>Material to avoid</b>                | Incompatible with oxidising agents (e.g. hypochlorites), acids (e.g. nitric acid), alkalis (e.g. sodium hydroxide), heat and ignition sources. |
| <b>Hazardous Decomposition Products</b> | May evolve toxic gases (carbon/ nitrogen oxides, hydrocarbons) when heated to decomposition.                                                   |
| <b>Hazardous Reactions</b>              | Hazardous polymerization is not expected to occur.                                                                                             |

## 11. TOXICOLOGICAL INFORMATION

|                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Health Hazard Summary</b> | May be harmful - irritant. This product has the potential to cause adverse health effects with over exposure. Use safe work practices to avoid eye or skin contact and inhalation. Carbamates may result in reversible anticholinesterase enzyme inhibition. Rapidly metabolised and excreted. When handled in small quantities the potential for dust inhalation and adverse health effects may be reduced. Adverse health effects are not anticipated when the product is used in accordance with label directions. |
| <b>Eye</b>                   | Irritant. Contact may result in irritation, lacrimation, pain and redness. Toxic effects may include blurring or dimness of vision and small pupils (miosis).                                                                                                                                                                                                                                                                                                                                                         |
| <b>Inhalation</b>            | Irritant. Over exposure may result in irritation of the nose and throat, coughing, weakness, blurred vision, nausea, vomiting, incoordination, breathing difficulties, excessive salivation and sweating.                                                                                                                                                                                                                                                                                                             |
| <b>Skin</b>                  | Irritant. Contact may result in irritation, redness, pain and rash.                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

**PRODUCT NAME DAVID GRAYS CRICKET & GRASSHOPPER KILLER BAIT**

|                      |                                                                                                                                                                                                                                  |                     |  |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--|
| <b>Ingestion</b>     | May be harmful. Ingestion may result in nausea, vomiting, abdominal pain, diarrhoea, fatigue, and sweating and/or salivation. Ingestion of large quantities may result in breathing difficulties, muscle spasms and convulsions. |                     |  |
| <b>Toxicity data</b> | 1-NAPHTHYL-N-METHYLCARBAMATE (CARBARYL) (63-25-2)                                                                                                                                                                                |                     |  |
|                      | LD50 (oral)                                                                                                                                                                                                                      | 128 mg/kg (mouse)   |  |
|                      | LD50 (dermal)                                                                                                                                                                                                                    | 2000 mg/kg (rabbit) |  |

**13. DISPOSAL CONSIDERATIONS**

---

|                       |                                                                                                                                                                                                                                                                                                                               |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Waste disposal</b> | For small amounts, absorb with sand, vermiculite or similar and dispose of to an approved landfill site. Contact the manufacturer/supplier for additional information if disposing of large quantities (if required). Triple rinse (or preferably pressure rinse) containers before disposal. Add rinsings to the spray tank. |
| <b>Legislation</b>    | Dispose of in accordance with relevant local legislation.                                                                                                                                                                                                                                                                     |

**16. OTHER INFORMATION**

---

|                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Additional information</b> | ORGANOPHOSPHATES-CARBAMATE PESTICIDES-LARVICIDES: These agents act by combining with and inactivating the enzyme acetylcholinesterase (an enzyme involved in nerve muscle coordination). The inhibition of the cholinesterase appears to be reversible following cessation of exposure at sub lethal concentrations (acute exposure). The principal manifestations of poisoning with cholinesterase inhibitor pesticides are visual disturbances, respiratory difficulty and gastrointestinal hyperactivity. |

**PERSONAL PROTECTIVE EQUIPMENT GUIDELINES:**

The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as form of product, method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

**HEALTH EFFECTS FROM EXPOSURE:**

It should be noted that the effects from exposure to this product will depend on several factors including: form of product; frequency and duration of use; quantity used; effectiveness of control measures; protective equipment used and method of application. Given that it is impractical to prepare a report which would encompass all possible scenarios, it is anticipated that users will assess the risks and apply control methods where appropriate.

**Report status**

This document has been compiled by RMT on behalf of the manufacturer, importer or supplier of the product and serves as their Safety Data Sheet ('SDS').

It is based on information concerning the product which has been provided to RMT by the manufacturer, importer or supplier or obtained from third party sources and is believed to represent the current state of knowledge as to the appropriate safety and handling precautions for the product at the time of issue. Further clarification regarding any aspect of the product should be obtained directly from the manufacturer, importer or supplier.

While RMT has taken all due care to include accurate and up-to-date information in this SDS, it does not provide any warranty as to accuracy or completeness. As far as lawfully possible, RMT accepts no liability for any loss, injury or damage (including consequential loss) which may be suffered or incurred by any person as a consequence of their reliance on the information contained in this SDS.
