Consult the National Poisons Information Centre 0800 POISON (0800 764 766) or a doctor in every case of suspected chemical poisoning. Have product label or Safety Data Sheet at hand.

INGESTION: Rinse mouth. Get medical advice if you/person feels unwell. Do not induce vomiting unless advised to do so.

SKIN CONTACT: Remove contaminated clothing. Wash skin with plenty of soap and water. If irritation or rash develops, obtain medical advice. Wash contaminated clothing before reuse.

EYE CONTACT: Flush with running water for at least 15 minutes. Remove contact lenses if present, and easy to do after 5 minutes before continuing rinsing. Get medical advice if irritation persists.

INHALATION: An unlikely exposure route. Remove patient to fresh air and keep at rest in a position comfortable for breathing until recovered. Get medical advice if you/person feels unwell.

First Aid facilities: Provide eye baths close to work areas.

Advice to Doctor: Treat symptomatically. For skin effects a therapeutic agent for pyrethrin/pyrethroid exposure is topical application of tocophenol acetate (Vitamin E).

5. FIRE FIGHTING MEASURES

Flashpoint: Non-flammable.

Suitable extinguishing media: Dry chemical, carbon dioxide, foam.

Hazards from combustion products: May generate toxic gases such as carbon monoxide, carbon dioxide and smoke.

Precautions for fire fighters and special protective equipment: Respond as if an oil fire. Cool fire exposed containers with water. Stay upwind. Wear self-contained breathing apparatus with full face-piece and protective clothing.
