CarbodoxTM

GENERAL INFORMATION

An Insecticide for the control
of ants, cockroaches and fleas.

ACTIVE INGREDIENT

Contains 50g/L Indoxacarb in the form
of a suspension concentrate.

CarbodoxTM is a trademark
of Key Industries Ltd

Manufactured
& Distributed by
Key Industries Ltd
15D Paul Matthews Road
PO Box 65-070, Mairangi Bay, Auckland 0754.

Read label before use. Do not handle until all safety precautions have been read and understood.

HAZARD CLASSIFICATIONS: 6.1E, 6.5B, 6.9B, 9.1D, 9.3C, 9.4A

TOXICITY WARNING: THIS SUBSTANCE MAY BE HARMFUL IF SWALLOWED. Repeated minor exposures may have cumulative effects. Do not inhale the spray mist. Do not eat, drink or smoke while using. Remove protective clothing immediately after handling this product and wash hands and face before meals and after work. Wash contaminated clothing before reuse

MAY CAUSE AN ALLERGIC SKIN REACTION.

MAY CAUSE ORGAN DAMAGE from repeated oral exposure at high doses.

ECOTOXICITY:

TOXIC TO AQUATIC LIFE. DO NOT contaminate any water supply with chemical or empty container. DO NOT spray over or allow to drift over an aquatic environment.

HARMFUL TO TERRESTRIAL VERTEBRATES such as birds or reptiles.

VERY TOXIC TO TERRESTRIAL INVERTEBRATES. Do not spray over bees or apply to plants in flower. Do not spray over beneficial predators.

HANDLING PRECAUTIONS

STORAGE: Store in the original container tightly closed and in a locked, dry, cool and well ventilated area – well away from foodstuffs. Storage must be generally in accordance with NZS8409.

PERSONAL PROTECTION

When mixing or applying, wear eye protection, chemical resistant gloves (e.g. PVC or neoprene), chemical resistant boots, waterproof hat and cotton overalls buttoned to the neck and wrist. When applying this product above 1m height an approved half/full face filter respirator for organic vapours should be worn. When spraying Carbodox below 1m height use a P2 disposable facemask as minimum respiratory protection

DISPOSAL

Triple rinse empty container and add rinsate to spray tank. Do not burn empty container that has not been rinsed. Recycle triple rinsed containers through an approved recovery scheme, eg Agrecovery. Otherwise, crush or puncture and bury in a suitably approved landfill. Dispose of this product only by using according to the label, with an approved waste disposal company or treat so that it is no longer hazardous and then dispose of safely in a managed landfill. Do not burn the product. Dispose of equipment cleaning water onto ground away from susceptible crops and plants.

SPILLAGE

Exclude all bystanders, prevent material entering waterways and coming into contact with other products. Wear appropriate protective clothing to clean up spills. Absorb spills with an inert (such as vermiculite, earth, sand or synthetic absorbent substance) material and place in waste containers. Wash area with a bleach solution

(sodium hypochlorite) then absorb any remaining liquid with further inert material. Dispose of waste with an approved waste disposal company.

FIRST AID

If medical advice is needed, have product container or label at hand. If swallowed do not induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If splashed in eyes, remove contact lenses if present and easy to do, flush eyes with water for at least 15 minutes and see a doctor if symptoms persist. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water and soap. If skin irritation or a rash occurs seek medical advice. If inhaled, move victim to fresh air immediately. If breathing has stopped, begin artificial respiration. Use mouth-to-nose rather than mouth-to-mouth.

NOTICE

Important: You **must** read the warning and conditions given on this label. If they are not acceptable, or if you are in doubt as to the proper handling of this product (including its transport, storage, use and disposal) then return the unopened product to the supplier at once.

Warning:

This product is subject to controls and could be hazardous if handled incorrectly. The **user is responsible** for ensuring that the handling of this product is in accordance with the law (including the **Hazardous Substances and New Organisms Act 1996**) and with the directions provided. Key Industries Limited declines all liability whether in contract, tort (including but not limited to negligence), (or otherwise), to the maximum extent permitted by law in relation to the handling of this product in a manner which is contrary to the directions given or to any applicable Acts, Regulations or Guidelines.

Further information regarding the applicable Acts, Regulations and Guidelines for the proper handling of this product may be obtained by contacting EPA New Zealand (www.epa.govt.nz). This product is warranted to contain the specified active ingredient within accepted analytical tolerance when packed.

MPI Approved type D (all animal products except dairy)

AssureQuality approved Category B6 C

Food/beverage/dairy factory and storage areas (Category B point apply)

HSNO Approval Code: HSR100876

AGRECOVERY

DIRECTIONS FOR USE

RESTRAINTS:

DO NOT apply to areas or surfaces where food/feed, food utensils or food processing surfaces may become contaminated.

DO NOT apply into, onto, or over any water body including fish ponds and aquariums

DO NOT use for agricultural purposes or in a widely dispersive manner.

GENERAL INSTRUCTIONS

This insecticide is a suspension concentrate insecticide required to be mixed in water and applied as a non-repellant residual spray to control cockroaches, ants and fleas in and around houses, flats, factories, shops, warehouses, restaurants, meat and dairy processing plants.

It is a non-repellent insecticide, allowing insects to pick up a lethal dose quickly as they are not repelled from treated areas. Therefore, it can be used in the same areas as bait products, without reducing the performance of the baits.

Following an application of the product it may take several hours before an effect is observed.

Mortality may take up to 24 hours to take effect. It does not have a flushing effect or fast "knockdown" properties like repellent insecticide products.

Length of protection depends on many factors such as the nature of the treated surface and environmental conditions. Maximum length of residual control is obtained under indoor and/or sheltered outdoor conditions.

Situations	Pests	Rates	Critical Comments
For inside and outside, houses, flats, factories, shops, warehouses, restaurants, meat and dairy processing plants	Cockroaches	For initial treatments use 100ml per/5 L. Ensure a minimum of 100mls product is applied per 100 m ² For maintenance applications use 50ml in 5 L and ensure a minimum of 50mls product is applied per 100 m ² .	Spray cracks and crevices where cockroaches are known to be hiding. A barrier spray around heavy infestations and around the perimeter of rooms is recommended. A perimeter spray around buildings will help control outdoor cockroach species. For areas where sprays are not suitable (for example around electrical equipment and power points), the use of Cockroach Gel bait such as Enforce™ is recommended.
	Ants		Spray areas of infestation and building entry points. A perimeter spray around the building and in flower beds will help prevent the entry of ants. For areas where sprays are not suitable (for example around electrical equipment and power points) the use of ant bait such as Anteater™ Ant Gel is recommended.
	Fleas	100mls per 5L	Spray floors and soft furnishings such as couches and chairs with a hydraulic sprayer, applying a minimum of 5 Litres per 100m ² . Less spray liquid will be needed on hard surfaces. Use a Coarse Nozzle, minimum size 04. Carpets should be thoroughly wet so the spray liquid will contact fleas deep in the carpet pile. Do not use a mister. Once carpet is dry it will be safe to re-enter, ventilate for a further 30 minutes. For heavy flea infestations add Sumilarv IGR to provide ongoing residual control of newly hatching nymphs
	Can be applied with a knapsack sprayer or other conventional spray equipment used to control public health pests, eg conventional cold misting equipment.		

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL
UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION**
