DIRECTIONS FOR USE

RESTRAINTS:
DO NOT spray Eco-Oil in temperatures exceeding 35°C.
WARNING Eco-Oil has been tested on a limited range of plant species for phytotoxic/burn reactions. Some plant species are more sensitive than others. For further details on plant safety contact the manufacturer. Maidenhair ferns may show commercially unacceptable burn symptoms.
DO NOT introduce predatory mites (*Phytoseiulus persimilis*) to the crop within 7 days of an Eco-Oil application.
DO NOT use through ULV fogging machines unless cold fogging system is in use.

CROP	PEST	RATE	CRITICAL COMMENTS
Tree, Vine and Vegetable crops, Home garden and commercial ornamental & floriculture crops and protected cropping including Shadehouse, Glasshouse & Polyhouses	Two-spotted mite (<i>T. urticae</i>), Green peach aphids, Greenhouse whitefly and various Scale pests	Use 5 – 10 ml / L	Regularly monitor plants for pest infestation and apply spray when they first appear. Apply two sprays 3-5 days apart. Use the higher rate when numbers are high. Repeat applications at signs of reinfestation but not within 7 days of last spray. Spray both upper and underside of leaves to run-off. A minimum spray volume of 1000L/ha is recommended.
		OR	
		75 - 150 mL/15 L (knapsack)	
		OR	
		500 ml – 1 litre/100 L	
		Use the higher rate for scale pests	

GENERAL INSTRUCTIONS

Eco-Oil is a botanical oil based Miticide/Insecticide that controls Two-spotted mite, Green peach aphids, Greenhouse whitefly and Scale pests in Home gardens, Commercial Tree, Vegetable and Vine crops, Nursery and Covered Cropping situations. For best results spray with Eco-Oil at the first sign of pest infestation. As Eco-Oil controls these pests by contact, it is important that good coverage of the pest or target is achieved. Eco-Oil has minimal residual activity, so repeat applications may be necessary.

MIXING:
1. Half fill the spray tank or vat with clean water.
2. Add the required amount of Eco-Oil while agitating and top up the tank with water. Agitate thoroughly prior to and during application.

COMPATIBILITY: Eco-Oil is compatible with most commonly used agricultural and horticultural products except the following: DO NOT USE WITH DELANT™, Chlorothalonil, BORDEAUX or Captan. DO NOT APPLY Eco-Oil within 10 days of a EUPAREN™ application.

STORAGE AND DISPOSAL:
KEEP OUT OF REACH OF CHILDREN
Store in the closed, original container, in a well ventilated area as cool as possible. Do not store for prolonged periods in direct sunlight. Triple, or preferably pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, puncture and bury empty containers in a local authority landfill. If not available, bury below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burnt.

ENVIRONMENT: Do not apply directly onto or into water. Avoid contamination of any water supply with chemical or empty container.

SHELF-LIFE: When stored appropriately, this product should show no significant degradation for two years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

SAFETY DIRECTIONS: Avoid inhalation of spray mist. If used with other sprays wear appropriate protective clothing as per relevant agricultural manufacturers' label. Registered pursuant to the ACVM Act 1997, No. P7069.
See www.nzfsa.govt.nz/acvm/ for registration conditions. ERMA NZ Approval Code: HSR 000004

NOTE: Because Horticulture Limited has no control over handling, storage or use of Eco-Oil, the company makes no expressed or implied representations or warranty (other than non excludable statutory warranties). This product is sold on the condition that the buyer and/or user assumes all risks of the handling, use of Eco-Oil and results obtained from its use.
