For use in food processing plants, meat packing plants, hotels, hospitals, stables, poultry houses, barns, restaurants, and other food handling establishments.

GUARD MIST INSECTICIDE is engineered for highly effective use in the **GUARD MIST** automatic aerosol dispenser, or other

similar type dispensers. The **GUARD MIST** dispenser automatically actuates the special metered valve every fifteen minutes releasing 50-55 mg of tiny particles which remain suspended in the air, killing flying insects. Within 24 hours the area is relatively free of small flying insects and with continued use, control is maintained.

One **GUARD MIST** is designed to protect an area of 170 m³ of free- flow air space.

DIRECTIONS: Remove protective cap from top of can and insert can into **Guard Mist** dispenser. Suspend the dispenser 2-3 metres from floor at a point where wind flow will carry particles throughout the room. Do not install directly over food or food processing surfaces.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. Container may explode if heated. Do not expose to temperatures above 50°C. Do not puncture or incinerate. Cover fish bowls in treated areas while dispensing. Do not use on foods. In meat packing and food processing plants, only spray when plant is **not** in operation. No exposed meat products, ingredients or packaging materials to be left in the room. Cover food handling equipment. Any treated surface that may contact meat food products should be washed and rinsed thoroughly with potable water after spraying and before re-use for food processing. In dairies, drawn milk and cream should be covered. In hospitals, do not use in nurseries or rooms where infants, ill or aged persons are confined. Avoid contact with skin and inhalation of spray mist. Wash after using. Contents toxic to fish and birds. Do not contaminate food, feed or water. Do not install directly over polished plastic or varnished surfaces.

DISPOSAL: When container is empty, press valve to release all remaining pressure. Dispose of empty container in accordance with provincial requirements. For information on the disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

FIRST AID: In case of contact with eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. In case of contact with skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

If accidentally swallowed, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information.
