Flying and crawling insect control

Flying and crawling insect control.

A pressurised handheld aerosol for use against flying insects such as flies, mosquitoes and other small flying insects by application as a space and surface spray. Can also be used against crawling insects such as ants, bedbugs, cockroaches, fleas. For indoor use only.

Directions for use:

For the control of flying insects, close all doors and windows and direct spray upwards into the centre of the room with a slow sweeping motion, 5-10 seconds in an average room (30 m²).

Vacate room and keep door closed for 15 minutes.

Ventilate before re-entry.

Spray can also be used directly on visible insect pests or applied in cracks and crevices suspected of harboring crawling insect pests.

Repeat as necessary.

USE BIOCIDES SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

When stored in a cool dry place at temperature above 0°C and not exceeding 25°C
