## V.K.2 FOGGING SOLUTION

**CONTAINS:** Propylene glycol 60-100%, Alcohols, c12-15, ethoxylated 1-5%.

**EVAPORATION RETARDING FOGGING SOLUTION**

VK2 is a food grade fogging solution for the effective application and dispersal of many sanitisers and pesticides primarily with Pulsfog thermal fogging and ULV machines.

**DIRECTIONS FOR USE:** Food processing and storage areas – 0.5 - 1 litre VK2 per 1000m<sup>3</sup> of air space.

Before use all food and food contact packaging must be removed or adequately protected. Evacuate area and place warning signs at entry points before commencing application. Leave closed for at least 2 hours then ventilate for 1 hour or as necessary to ensure work exposure standards are not exceeded after re-entry.

Greenhouse Crops – 0.5 litres VK2 mixed with 1.5 – 2.5 litres water per 1000m<sup>2</sup> – 3000m<sup>2</sup> direct over top of or below crops not directly at foliage. Evacuate area and place warning signs at entry points before commencing application. Leave closed for at least 2 hours then ventilate for 1 hour or as necessary to ensure work exposure standards are not exceeded after re-entry.

Cautionary notes: Comply with the label directions of any chemicals mixed with VK2. Only use with chemical products that are suitable for use with the type of application equipment used. Label re-entry and withholding periods must be complied with. Evacuate area and place warning signs at entry points before commencing application and lock up on completion. Ensure tanks are clean before commencing. Agitate mixtures well. Never mix more than two known compatible insecticides or fungicides with VK2 at once in ultra low volume (ULV) equipment. Use at the rates on the label or in authorised guideline for ULV rate adjustment. Use application equipment in accordance with the manufacturer's instructions. Avoid direct contact with surfaces in close proximity with the equipment barrel as chemical concentration will be too high. Ensure the fog does not contaminate non target areas. Excess air movement may result in accumulation of fog in localised pockets and excess concentration. Travel direction should be from furthest point to exit. Mix sufficient only for the immediate job. Do not store VK2 mixtures. If in doubt always call for technical support before proceeding.

**Consult your Ecolab Representative for specific use instructions and recommended dispensing equipment.**

**FIRST AID:** Immediately call the NATIONAL POISONS CENTRE 0800 764 766 or a doctor/physician, have product container or label at hand.

IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

IF ON SKIN (or hair): Remove/Take off all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.

IF EXPOSED OR CONCERNED: Get medical advice/attention.

**PRECAUTION:** Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required including gloves and eye or face protection. Wear protective clothing. Use respirator canisters or cartridges rated for the chemicals being used. A2B2P3 is suggested as a minimum. Keep only in original container. Avoid release to the environment. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.

**STORAGE:** Keep container tightly closed. Keep container in a cool well ventilated area. Store locked in an upright position away from foodstuffs.

**DISPOSAL:** Contain spilled material. For small spills add absorbent, scoop up material and place in a sealed, liquid-proof container for disposal. For large spills, diko spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

READ SAFETY DATA SHEET BEFORE USING THIS PRODUCT

### EMERGENCY RESPONSE INFORMATION SERVICE 0800 243 622 (0800CHEMCALL)

Causes skin irritation.

Harmful to aquatic life with long lasting effects.

**MPI APPROVED C 101-17 (ALL ANIMAL PRODUCTS EXCEPT DAIRY)**

**MPI RECOGNISED FOR USE IN DAIRY PROCESSING** - Suitable for use in all areas. The substance may be used

on non-operational product contact surfaces and non-operational air/ducts/vents provided no residues remain. Substance shall have no direct contact with dairy or food products. After use, food areas must be adequately ventilated. Food contact surfaces should be rinsed with potable water before use or sufficient withholding time given to allow residues to decay/escape or shall require surfaces to be rinsed with potable water to remove any residues. Any products mixed with VK2 will modify the above in accordance with the approvals for those products.
