

CELLULAR GATEWAY

MultiTech Conduit

Frequently Asked Questions

Will this system be accessing or slowing down my Wi-Fi network?

No, the Intelligent Rodent Monitoring system operates on a closed, stand-alone system. It does not interact with your Wi-Fi or any other IT systems in the way.

How are you ensuring data security?

Ecolab has formal policies to ensure data backups are tested, maintained and secure. We also have a 24/7/365 Security Operations Center that detects, prevents and alerts on vulnerabilities and intrusion attempts. Our governance committee and management review processes to ensure compliance for both on-premise and cloud-based systems.

The Conduit features LoRaWAN local communication with a 4G-LTE cellular backhaul which connects to Ecolab’s cloud.

- **Input Voltage:** 120 VAC
- **LoRA Frequency Band:** 915 MHz
- **Operating Temperature:** -30° to +70° C / -22° to + 160°F
- **Regulatory Certifications:** EMC Compliance: FCC Part 15 Class A (US) & ICES-003 Class A, Radio Compliance: FCC Part 22, 24, 27 (US) & Canada: ISED, Safety: UL/cUL 60950-1, UL/cUL 62368-1
